RE Closeout Reports for Building 116 and Trailer 117A

Dear Mr Legare

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the Closeout Reports for Building 116 and Trailer 117A dated December 15, 2003. This information was received on January 5, 2004. We appreciate being provided this information for our review.

Since it is not clearly stated (and indicated that water and sewer lines were air-gapped at grade), it is our understanding that all of the in-ground infrastructure associated with these facilities have been removed to three feet or greater below grade. We appreciate the information regarding the sewer lines, water lines, conduits, etc as discussed and shown on the various figures. However, it would also be appreciated if this and future information would clearly identify the specific infrastructure removed and that remaining as well as its condition.

In addition, it is also our understanding that the manholes next to Building 116 and Trailer 117A (MH-163 & 164) were plugged with concrete grout and removed to below three feet of grade, and that MH 165, 166, and 75 remain in place, with final remediation to be performed at a later date.

If this information is incorrect or if you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H Gunderson
